

To: Prospective Cell Phone Carrier

RE: Cell Phone Service in Hyco Lake Area

We would like to state our support for cell phone service in the Hyco Lake area of Person County. Presently the cell phone service in this area is very poor to non-existent with problems through out the whole area.

We have one school located at Hyco Lake with a staff of 33 who need cell phone service for emergency purposes and their own personal use. Also we have another school in close proximity, Stories Creek with a staff of 59 that would benefit from cell phone service as well since many of these teachers and students live close to Hyco.

We have approximately 650 employees in Person County with many living in this general area that could benefit from this service. Also we have buses that travel in this area and would benefit from cell phone service for emergencies. We have maintenance personnel who need adequate cell phone service for communication purposes in this area daily.

We believe that the walkie-talkie type service would be most valuable to our maintenance staff and transportation department and would allow us much needed communication that we do not currently have.

There appears to be considerable support for a cell phone company to provide this service.

If you need additional information please feel free to contact me at 336-599-0223. Thank you for your time and attention in this matter.

Sincerely,

Larry King
Director of Environmental Service
